Release Overview

Release Version	UltraBand 5.7.21
Release Date	Jan 24, 2020
Release Type	General Availability
Deliverables	- Upgrade Package to UltraBand 5.7.21 - Release Documentation (Release Notes)
Additional Information	Improvements since UltraBand 5.7.20 release: Defects - 1

Customer Defect(s)

JIRA ID	Zendesk ID	Description
PAUB-27464		Sudden Application Crash

Fault Analysis Report

Sudden Application Crash

An unexpected application exit was noticed on a customer's grid. It was noted that, under heavy load, the system would reach disk IO timeouts that would otherwise not be reached. After careful analysis, it was noted that by increasing the default value, the system could handle higher pressure without negative effects. It has thus been decided to increase the default IO timeout value to accommodate these high-intensity scenarios.
